Leetcode

Skill Summary

Languages: java,C++ ,python,javascript,typescript,C

Frontend Technologies: React js ,Next.js, HTML,CSS , Bootstrap , tailwind CSS

Backend Technologies: java,javascript, node.js, Express.js, RESTful APIs, EJS, Oauth,prisma,

Databases: PostgreSQL , MySQL, NoSQL, MongoDB, redis

Software Engineering: Git,SystemDesign. CI/CD,Docker

Modules: Numpy , Pandas, Matplotlib , OpenCv , Tensorflow

Tools: VSCode, IntelliJ Idea, jupyter ,GitHub, MS Office, PowerBI

Soft Skills: Leadership,Time management,,Communication,Team management

Education

Techno India University B.tech - Computer Science and Engineering

Aug 2021 – May 2025

- CGPA: 7.7

- **Coursework:** Computer Architecture, Computer Networks, Database Management System, Operating System , Machine Learning, Data Structure and Algorithms, Natural Language Processing , Graph Theory, Game Theory,Machine Learning

St Thomas Church School -ISC

Apr 2019 – Mar 2020

- Percentage :78

St Thomas Church School -ICSE

Apr 2017 – Mar 2018

- Percentage: 82

Experience

Software Developer Intern — Umam

january-March 2025

- Built and maintained **full-stack MERN applications** supporting real-world workflows.
- Designed and optimized **NoSQL (MongoDB) data models** for scalable transaction handling.
- Developed **RESTful APIs** and integrated them with React frontends.
- Improved system performance using **Redis caching and query optimization**.
- Collaborated in Agile teams to ship **production-ready features**.

Software Developer Intern - Auralix AI May-june 2025

gitHub

- Developed **AI-powered backend services** using **Node.js, Python, and OpenAI APIs** to automate data processing and content generation.
- Built and optimized **RESTful APIs** to support AI-driven features and real-time application workflows.
- Designed and managed **NoSQL and SQL databases** for storing AI outputs, user activity, and system logs.
- Implemented **authentication, role-based access control, and secure API endpoints**.
- Improved system reliability and scalability through **caching, background jobs, and optimized query handling**.

- Collaborated with frontend teams to integrate **AI models with full-stack web applications**.

Github

Projects

Loop AI Auto-Journaling Platform

- Built on | Next.js, Prisma, PostgreSQL, OpenAI API
- It is a platform that **auto-organizes** user activity into timelines. - Implemented CRUD operations with Add, Edit, Filter, and Search functionality.
- Provides real time data to the user for getting the productivity of the given day and week.
- Built a **Chrome Extension** for tracking the visited tabs and the amount of time spend on the tabs

SupaSkill

- **AI Resume Optimizer** | Node.js, React, LangChain, OpenAI API
- Built AI tool that tailors resumes to match job descriptions using NLP.
- Increased resume-job match accuracy by 60% using OpenAI embeddings.
- Implemented real-time skill extraction and profile suggestions.

E-Commerce Platform

- Built on | MERN, Redis, Stripe
- Built a **full-stack e-commerce application** with authentication, cart, orders, and payments.
- Integrated **Stripe** for secure online transactions.
- Used **Redis caching** to reduce checkout latency and improve performance.
- Designed **scalable REST APIs** for products, users, and payments.

Achievements

- **Hackerrank** - 5* Coder
- **Coursera** - Java problem solving for software
- **Udemy**-Fullstack Web Development
- **300+** problem solved on various platforms as GFG, Hackerrank and Leetcode
- **Chess.com**- rating **1532**
